Ink duct foils, accessories and chemicals

Ink duct foils (Poliner)

Poliners are ink duct foils (ink fountain liners) made of milky white, biaxially oriented PET: they are highly resistant to heat, as well as chemical and mechanical stress. Manufactured to OEM specifications, they are easy to install onto the Heidelberg and KBA ink duct.

Our Poliners, designed for Heidelberg presses equipped with CPC/CP2000 control units, are available in three versions

CD/CC profile, for the CD press series, which require a narrow U-shaped fold

Standard profile, with regular fold

Chemicals

chemicals for offset

PRE-PRESS LINE

polichemical 80E

cleans the rollers of plate processors

polichemical densitone spray

Used to increase the toner density on Polimat Laser (laser film for originals)

PRESSROOM LINE

polichemical 102E

plate cleaner

polichemical 103E

cleans the ink rollers of the press before color change

polichemical PR

anti set-off powder, available in different particle sizes.
15, 20 and 23 are recommended for commercial paper; 35 is recommended for thick paper and cardboard

VARNISHING LINE

polichemical anilox deep cleaner

for periodic cleaning of anilox cylinders

polichemical varnish wash

removes any residue of water based varnish from the varnishing plate before its

polichemical adhesive remover

cleaning solution for cylinders. Box of 20x1 l bottles
